PROFESSIONAL PROFILE

Led the design and development of scalable web and mobile applications using React, React Native, and Node.js. Engineered robust front-end interfaces. Integrated complex REST APIs and third-party services, and crafted intuitive user experiences using Figma. Delivered critical features for high-impact apps, including Pago Fácil and Western Union, ensuring functionality for millions of users under real-world conditions.

Key strengths:

- Delivered critical application features for scalable products.
- Designed and implemented clean architecture patterns and efficient data models to enhance performance and maintainability.
- Created user-focused interfaces and interaction flows using Figma, aligning UI/UX with product goals.
- Integrated complex third-party services and APIs, ensuring seamless functionality across platforms.
- Communicated effectively with clients, technical partners, and external integration teams to align expectations and resolve issues quickly.

PROFESSIONAL EXPERIENCE

Bizland Tech - Mobile & Full Stack Developer

FinTech | August 2024 – Present

Tech stack: React Native, Redux, TypeScript, Firebase, AWS (Serverless), Figma, REST API.

Currently contributing to Bizland Tech's PSP (Payment Service Provider) solution, collaborating on integrations with multiple digital wallet clients.

Main client: Pago Fácil and Western Union, where I implemented new features and led key integrations for the Pago Fácil app, which has over 1.5M downloads and 500K+ active monthly users on iOS and Android.

Key responsibilities:

- Improved codebase quality and optimized performance across mobile platforms.
- Resolved production incidents rapidly, ensuring system stability and fast recovery.
- Developed scalable and maintainable new features to meet evolving client needs.
- Designed user-centric interfaces in Figma, enhancing usability and visual coherence.

Hybeans - Web & Mobile Developer **EventTech | May 2022 – August 2024**

Tech stack: React, React Native, MST, Firebase, Figma, REST API

Contributed as a key member of the core development team for Hybeans, a dynamic event management and social interaction platform designed for mobile and web users. The platform enabled users to discover, attend, and interact around live events through real-time features, digital ticketing, and social engagement tools. My role involved end-to-end feature development, from UI/UX implementation with Figma to backend integration using Firebase, always aligned with Agile methodologies and tight delivery schedules.

Main contributions:

- Built and maintained product sales and order tracking features for both buyers and sellers.
- Developed an event and booking calendar with real-time confirmation capabilities.
- Implemented digital ticketing systems with on-site and in-app validation.
- Integrated social features including feeds, live chat, and push notifications.
- Connected interactive location maps to enhance user experience during live events.
- Collaborated closely with design, QA, and backend teams to ensure on-time, high-quality feature delivery.
- Participated in live event deployments, monitoring stability and troubleshooting issues in critical conditions.

Freelance Developer – Full Stack Developer

November 2020 – May 2022

Tech stack: Java, Spring Boot, PostgreSQL, React, AWS

Worked independently as a full stack developer, delivering end-to-end solutions for a variety of clients across different sectors. Projects included:

- Designed and developed a custom stock management system with backend in Spring Boot, PostgreSQL database, and AWS cloud deployment.
- Built responsive websites for small organizations, implementing modern UI components and lightweight content management tools.
- Gathered and analyzed functional requirements directly from clients to ensure tailored and scalable solutions.

These experiences strengthened my ability to translate business needs into technical implementations, while also enhancing my communication and project ownership skills.

EDUCATION

Higher Technical Degree in Computer Science

Universidad Nacional de General Sarmiento – Buenos Aires, Argentina

Java Programming Diploma

Universidad Tecnológica Nacional – Buenos Aires, Argentina

Bachelor's Degree in Philosophy (incomplete)

Universidad de Buenos Aires – Buenos Aires, Argentina

SKILLS

Languages & Frameworks

React · React Native · TypeScript · JavaScript · Java · Spring Boot · Node.js · HTML · CSS

Backend & Databases

Firebase (Firestore, Realtime DB, Auth) · PostgreSQL · MongoDB · REST APIs · AWS Serverless · SQL & NoSQL

Tools & Platforms

Figma · Git · Jira · Xcode · Android Studio · App Store Connect · Google Play Console

Technical & Soft Skills

Technical leadership · Teamwork · Effective communication · Problem-solving · User experience focus
